

MICHAEL ROBINSON

SOFTWARE DEVELOPER | C# | JAVA | WEB APPLICATIONS

Maricopa, Arizona | mike.robinson1979@gmail.com | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Software Development student and founder of Ghostline Technology LLC building C#, Java, and responsive web applications through academic and independent projects. Experienced with object-oriented programming, Windows Forms, Java Swing, layered application architecture, file persistence, GitHub, and software testing. Brings extensive transportation and operations experience to the design of practical, business-focused software.

TECHNICAL SKILLS

Languages: C#, Java, JavaScript, HTML, CSS

Frameworks and UI: .NET, Windows Forms, Java Swing, Bootstrap, DataGridView

Development: Object-oriented programming, layered architecture, List<T>, file I/O, input validation, debugging, Maven

Tools: Visual Studio, Visual Studio Code, Git, GitHub, GitHub Pages

FEATURED SOFTWARE PROJECTS

Ghostline Chess | C# / .NET / Windows Forms

- Built and released a playable Windows desktop chess prototype with object-oriented game-state tracking and a custom gothic interface.
- Implemented legal move validation, check and checkmate, castling, en passant, promotion, stalemate, insufficient material, threefold repetition, and the fifty-move rule.
- Added FEN import and export, invalid-position handling, move history, captured-piece displays, and visual check indicators.

FleetTrack Pro | Java / Swing / Maven

- Developing a desktop operations system for managing vehicles, drivers, employees, jobs, maintenance records, and evaluations.
- Applied object-oriented models, reusable manager classes, Swing interfaces, sorting, validation, and persistent business data organization.

Food Inventory Management System | C# / Windows Forms

- Created an n-layer inventory application with separate presentation, model, business, and data responsibilities.
- Used List<InventoryItem> as the master collection with DataGridView display, multi-form search, add/remove operations, quantity controls, validation, and text-file persistence.

Ghostline Technology Portfolio | HTML / CSS / Bootstrap / JavaScript

- Built and deployed a responsive multi-page company portfolio through GitHub Pages with product pages, development logs, project galleries, reusable navigation, and a Formspreet contact workflow.

SOFTWARE DEVELOPMENT EXPERIENCE

Founder and Software Developer - Ghostline Technology LLC | 2026 - Present

- Plan, build, document, test, and publish independent software and game prototypes under Ghostline Software and Haunted Echoes Studios.
- Maintain source repositories, release documentation, project roadmaps, brand websites, and public development updates.

PROFESSIONAL EXPERIENCE

CDL Truck Driver - Howe Precast Concrete Barrier | July 2023 - Present

- Coordinate time-sensitive deliveries, route planning, load securement, inspections, and DOT-compliant documentation in a safety-critical environment.

CDL Truck Driver - 10 Roads Express | December 2021 - July 2023

- Operated scheduled routes under strict deadlines while maintaining accurate logs, regulatory compliance, and dependable service.

CDL Truck Driver - US Foods | November 2020 - December 2021

- Delivered food products in a high-demand environment requiring accuracy, customer service, physical endurance, and rapid problem-solving.

EDUCATION AND TRAINING

Bachelor of Science in Software Development - Grand Canyon University | In Progress

- Relevant study includes C# programming, object-oriented development, application design, data structures, software testing, and secure development.

Undergraduate Certificate in Programming Essentials, With Honors - DeVry University | Awarded February 2024

- Completed programming and software-development coursework covering hardware and software integration, Linux operating systems, and Python application development.

Associate of Applied Science in Emergency Medical Technology - Glendale Community College

Additional Training

- Commercial Driver's License - Class A with endorsements
- U.S. Army Chemical Operations Training
