SUMMARY

Software Development student with a strong background in logistics and operations, transitioning into web and software development. Experienced in building responsive web applications and developing real-world software solutions using Java and object-oriented programming. Known for problem-solving, reliability, and the ability to quickly learn and apply new technologies through hands-on projects.

TECHNICAL SKILLS

- **Front-End:** HTML5, CSS3, Bootstrap, JavaScript
 - **Programming:** Java (Object-Oriented Programming)
 - **Tools:** Git, GitHub, Visual Studio Code
 - **Concepts:** Responsive Web Design, Debugging, UI Development
 - **Additional:** Version Control, Basic Troubleshooting
-

PROJECTS

FleetTrack Pro (Java Application)

- Designed and developed a desktop fleet management system using Java and object-oriented programming
- Built features for managing employees, equipment, jobs, and maintenance workflows
- Implemented structured data management using ArrayLists and modular class design
- Developed a graphical user interface using Java Swing

- Packaged and deployed the application as a runnable JAR file
 - Focused on real-world logistics operations based on industry experience
 - **Live Project:** <https://ghostlinetech.com>
 - **Source Code:** <https://github.com/miker1979/fleet-management-java>
-

Responsive Multi-Page Portfolio Website

- Built a responsive multi-page website using HTML, CSS, Bootstrap, and JavaScript
 - Designed reusable layouts, navigation systems, and structured page components
 - Applied mobile-first responsive design for cross-device compatibility
 - Deployed using GitHub Pages with version control through Git
 - Integrated a working contact form using Formspree
 - **Live Site:** <https://ghostlinetech.com>
 - **Source Code:** <https://github.com/miker1979/responsive-multi-page-website>

PROFESSIONAL EXPERIENCE

CDL Truck Driver

Howe Precast Concrete Barrier — July 2023 – Present

- Transport precast concrete barriers in DOT-regulated environments
 - Manage load securement and ensure compliance with safety regulations
 - Plan routes and deliveries to meet deadlines and optimize efficiency
 - Perform vehicle inspections and maintain accurate documentation
-

CDL Truck Driver

10 Roads Express — December 2021 – July 2023

- Operated scheduled routes with strict delivery timelines
- Maintained accurate logs and ensured compliance with safety standards

- Demonstrated reliability in time-sensitive logistics operations
-

CDL Truck Driver

US Foods — November 2020 – December 2021

- Delivered products in high-demand, fast-paced environments
 - Managed physically demanding deliveries and customer interactions
 - Maintained accuracy in order handling and documentation
-

EDUCATION

Software Development (In Progress)

Grand Canyon University

Associate of Applied Science – Emergency Medical Technology

Glendale Community College

Commercial Driver's License (Class A, Endorsements)

U.S. Army Chemical Operations Training

ADDITIONAL STRENGTHS

- Strong problem-solving and troubleshooting ability
- Ability to work under pressure in fast-paced environments
- Adaptability and quick learning of new technologies
- Strong attention to detail and organization
- Effective communication and teamwork skills
