SUMMARY

Software Development student transitioning from a strong background in logistics and operations into web development and programming. Experienced in building responsive web applications using HTML, CSS, Bootstrap, and JavaScript, with ongoing development in Java and object-oriented programming. Known for problem-solving, reliability, and the ability to learn quickly through hands-on projects.

TECHNICAL SKILLS

- HTML, CSS, Bootstrap
- JavaScript (fundamentals)
- Java (in progress)
- Responsive Web Design
- GitHub & Version Control
- Visual Studio Code
- Basic debugging and troubleshooting

PROJECTS

Responsive Multi-Page Portfolio Website

- Built a responsive multi-page website using HTML, CSS, Bootstrap, and JavaScript
- Implemented navigation, layout design, and reusable components
- Deployed live using GitHub Pages
- Integrated a working contact form using Formspree for real-time email functionality

Live: <https://miker1979.github.io/responsive-multi-page-website/>
Code: <https://github.com/miker1979/responsive-multi-page-website>

Fleet Management Software (In Progress)

- Developing a Java-based application to manage vehicles, drivers, and maintenance records
- Applying object-oriented programming concepts and data organization
- Designing system structure for scalability and real-world business use
- Planning future GUI implementation

PROFESSIONAL EXPERIENCE

CDL Truck Driver

Howe Precast Concrete Barrier – July 2023 – Present

- Transport precast concrete barriers safely and efficiently
- Manage load securement and compliance with DOT regulations
- Plan routes and deliveries to meet deadlines and optimize efficiency
- Maintain vehicle inspections and documentation

CDL Truck Driver

10 Roads Express – December 2021 – July 2023

- Operated scheduled routes with strict delivery timelines
- Maintained accurate logs and compliance with safety standards
- Demonstrated reliability in time-sensitive logistics operations

CDL Truck Driver

US Foods – November 2020 – December 2021

- Delivered food products in high-demand environments
- Handled physically demanding deliveries and customer interactions
- Maintained accuracy in order delivery and documentation

EDUCATION

Software Development (In Progress)

Grand Canyon University

Associate of Applied Science – Emergency Medical Technology
Glendale Community College

Commercial Driver's License (Class A, Endorsements)

U.S. Army Chemical Operations Training

ADDITIONAL STRENGTHS

- Strong work ethic and reliability
- Problem-solving under pressure
- Adaptability and fast learning
- Team collaboration and communication
- Safety-focused mindset
